

**Altema Foundry** was born in 1989 as a gravity die casting foundry in aluminium sector and marked this sector with her ductility in services and production capacity with the aim to complete the customer needs; this method gave to Altema the opportunity to extend his sector of action. Altema is the supplier of very important companies that operate in Italy that have increased Altema's production allowing her to go over the last years crisis.

At now our aim is to take a high level position in our sector following these objectives:

- Mantain a high level of quality in articles and services (high level of proficiency)
- Training (and update) of the skills of all Altema employees
- Support to the customer in all production processes of new products
- Rapid problem solving to customer questions
- Flexibility and adaptation to the market sector
- Control of production process
- Care to fulfil all needs
- Care to continuos improvement of quality system

Management is confident that every Employee of Altema will follow the suggestions to gain the objectives expressed above for Altema wellness and for their personal gratification. Their aim will be a continuos improvement of the system and will face all risks and opportunities with proper actions about the impact of the conformity of the products
